

Design engineer with seven years across design and front-end. I translate product designs and component libraries into scalable, accessible, high-performance front-end — Figma to production React and Next.js, with the interactions and micro-interactions that make a product feel alive. I own quality end to end across performance, accessibility, SEO and cross-browser delivery, and I build with agentic AI daily while designing the workflows around it.

00 EXPERIENCE

Design Engineer · Front-end Developer

Jun 2024 — Jun 2026

Prezi · Remote, Portugal

- Established **AI-assisted development workflows** (Cursor, Claude, Claude Code + reusable components) that cut implementation time from 3–8h to under 15 min per campaign.
- Hand-coded responsive, pixel-precise UIs from Figma as **reusable, modular components**, making implementation decisions where mockups left states unspecified.
- Improved maintainability by standardizing reusable components and development patterns across lifecycle campaigns.
- Owned cross-client QA, accessibility and performance through Litmus — dark mode, mobile-first rendering, Gmail, Outlook, Apple Mail.
- Ran subject-line and CTA A/B tests at **3M+ sends per arm**, collaborating with design and analyzing results in Hex.

Web Designer & Developer

Dec 2023 — Jun 2024

Hakkoda · Remote, Portugal · 6-month contract

- Translated Figma designs into responsive production websites using modern front-end best practices — semantic HTML, SEO fundamentals and performance in mind.
- Built and shipped the marketing site end to end on WordPress (Figma, HubSpot), modeling and maintaining content directly in the CMS.

Front-end Engineer · Designer

2021 — 2023

Pier · Remote, Brazil

- Built React + DatoCMS landing pages as reusable component systems for quarterly OKRs — designed in Figma, coded end to end, with the scroll and hover micro-interactions.
- Led the Pier × Tinder Carnival co-marketing visual system across landing page, swipe-card ad creative and brand surfaces — **5M+ impressions in 7 days**.
- Introduced AI-assisted workflows (early adopter, 2023) to accelerate creative production and front-end implementation — production ad creatives at **1M+ impressions/week** per campaign.
- Worked side by side with content, engineering and PMs in a fast-moving acquisition team.

Web Developer — Freelance

2020 — present

Brazil · Portugal · Germany

- Design and build production-ready websites and digital products for international clients — React, Next.js, WordPress and Node.js, from Figma to deployment.

01 STACK

DESIGN ENGINEERING

Figma · Design systems · Component architecture · Design tokens · Motion (Framer Motion) / micro-interactions · Adobe CC

FRONT-END

React · Next.js · TypeScript · JavaScript · Semantic HTML · Modern CSS · CSS architecture · Component-driven development · Tailwind CSS · Responsive UI · Accessibility · SEO fundamentals · Cross-browser & device · Node.js

AI & WORKFLOW

Claude · Claude Code · Cursor · Prompt engineering · Agentic workflows · Figma → code

CMS & CONTENT

WordPress · DatoCMS · Content modeling · Content migrations

DELIVERY & QA

Git · Performance · A/B testing · Litmus · Hex · Braze · Liquid

02 EDUCATION & BACKGROUND

B.A. Industrial Design

UniverCidade · Rio de Janeiro · 2007–2010

Artist Assistant · Contemporary Art
Luiz Zerbini, Luiz Roque & others · Rio de Janeiro · 2015–2020

Full-stack Coding Bootcamp

Le Wagon · Lisbon · 2020

The Web Developer Bootcamp

Udemy · 2019
